Initial-model catalog-DD resolution and shared-pick noise
Stage 0; fixed weights, masks, smoothing and damping

Masked nodal resolution
(diagonal interpolated for display)

Picking-noise standard deviation
(full covariance propagated to each point)

Y = -30 km Geoid depth (km)
Y = -20 km Geoid depth (km)
Y = -10 km Geoid depth (km)
Y = 0 km Geoid depth (km)
Y = 10 km Geoid depth (km)
Y = 20 km Geoid depth (km)
Y = 30 km Geoid depth (km)
